CONSERVATION DISTRICTS OF MANITOBA

Annual Report 1983

Manitoba
Natural Resources

85-3761/

Her Honour,
The Honourable Pearl McGonigal,
Lieutenant-Governor of the Province of Manitoba

May It Please Your Honour:

The undersigned has the honour to present the Annual Report of the Conservation District Boards of Manitoba for the year ending December 31, 1983.

Yours truly,

Al Mackling,
Minister of Natural Resources.

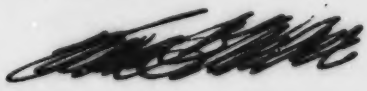
The Honourable Al Mackling
Minister of Natural Resources

Dear Sir:

I have the honour to present herewith the Annual Report of the Conservation District Boards of Manitoba.

The report describes the activities of the Boards of the Whitemud Watershed Conservation District, the Turtle River Watershed Conservation District, the Turtle Mountain Conservation District, the Alonsa Conservation District and the Cooks Creek Conservation District during the period January 1, 1983 to December 31, 1983.

Yours truly,



T. E. Weber, P. Eng.,
Director,
Water Resources Branch

Mr. T. E. Weber, P. Eng.
Director,
Water Resources Branch

Dear Sir:

In accordance with Section 46 of the Conservation Districts Act, S.M., 1976, C.38, and the Regulations under the said Act, I submit herewith the Annual Report of the Conservation District Boards of Manitoba for the year ending December 31, 1983.

Yours truly,

W. R. Newton, P. Eng.,
Manager,
Conservation Districts Authority

INTRODUCTION

1983 - ANNUAL REPORT

CONSERVATION DISTRICTS OF MANITOBA

I GENERAL

The Conservation Districts Act, Chapter C175, S.M. 1976 provides for the establishment of conservation districts within Manitoba and for the formation of boards to administer the affairs of such districts. These boards are comprised of landowners and municipal officials appointed by the municipalities having lands within the district.

As of December 31st, 1983 there were five districts operating under the Conservation Districts Act; the Whitemud Watershed Conservation District, the Turtle River Watershed Conservation District, the Turtle Mountain Conservation District, the Alonsa Conservation District, and the Cooks Creek Conservation District.

II THE CONSERVATION DISTRICTS ACT (1976)

(A) District Boundaries

Districts formed under the Conservation Districts Act have boundaries that may be determined by either the area outlined by the drainage basin of the major river of the district or the boundaries of the municipalities forming the district. The emphasis has been to form districts on the basis of watersheds because one of the major elements of a district program is water management. A district may be divided into smaller management areas called sub-districts.

The formation of a conservation district establishes a single authority having the responsibility of conserving and managing the water, soil and related resources within the district. This provides a comprehensive approach to the management of the natural resources within the designated area.

(B) How A District is Formed

Normally a municipal council must initiate action toward forming a conservation district. The council begins the process by submitting a resolution to the Minister requesting that a district be formed. Regardless of the size or number of municipalities in the proposed district, one resolution is all that is needed to begin the process. When the Minister receives the resolution a proposal may be prepared for the formation of a district. The Act also allows the Minister to submit a propsal for the establishment of a district on his own motion.

The proposal describes the district, delineates the sub-districts if any, lists all municipalities that are included in the district and outlines the suggested tax levy within which the district must operate. This proposal is forwarded to the included municipalities for the review and approval or rejection of council.

A period of information gathering may be conducted between the time of the initial request and submitting the proposal. Member municipalities may hold meetings with provincial representatives, and conduct public meetings to gather and examine vital information necessary in determining whether or not to form a district. Public meetings allow the ratepayers to express their opinions toward forming a district.

Once the proposal has been received by the included municipalities, each council has 60 days to approve or disapprove it by by-law. The council must then notify the Minister of its decision by copy of the by-law. Upon receipt of by-laws from each of the councils within the proposed district, the Minister will submit his recommendation to the Lieutenant-Governor in Council who may establish the district. The incorporation of the district takes effect with a printed notice in the Manitoba Gazette.

(C) District Boards

(1) Organization

Once the district is established each included municipality is required to appoint 2 members to each sub district having lands within the municipality, only one of whom may be a councillor. The members so appointed are known collectively as the sub district committee. The committee must then select one of their members as chairman. The chairman of each sub district becomes a member of the district board. One additional member is appointed to the Board by the Lieutenant-Governor-in-Council. The Board then elects one of their members as chairman. If a district involves only a single municipality, the municipality must appoint four persons, only two of whom shall be councillors. Once the district is established, the members of the Board become a coporate body.

In order to assist and guide the boards, a person known as the coordinator has been designated for this purpose by the Minister. The Department also provides at no cost to the district, certain planning, technical and administrative staff to assist the boards in achieving their aims and objectives.

(2) Objectives and Authority

The prime objective of a conservation district board is to provide for the conservation, control and effective management of the resources of the district. To this end, with the assistance of the department, the Board develops a resource management plan or scheme. The scheme may contain elements of any or all of the following:

Water management and flood control, drainage maintenance and development programs, land treatment practices, reforestation, fisheries, wildlife and recreation programs and such other programs of resource conservation and development as the Board may deem necessary or desirable.

The Board has been given considerable authority by the Act in order that it may implement the scheme. For example the board may:

a) construct and operate reservoirs for water supply and sell the water;

b) enter into agreements with landowners to conduct soil and water management practices (i.e. stock watering dams, shelterbelts, grassed waterways);

c) assume responsibility and authority for all water control and land rehabilitation works within the district;

d) establish protected areas;

e) issue permits for cutting forests on protected areas and for altering surface water courses;

f) buy and sell land or recommend that the province acquire certain land necessary for the achievement of the aims and objectives of the scheme;

g) require the municipalities to furnish to the board information pertinent to the scheme;

h) for the purposes of the scheme borrow money and issue debentures as security;

i) with the consent of the included municipalities affected and the approval of the Lieutenant Governor-in-Council, assume control over works that are under the authority, jurisdiction or control of a municipality;

j) enter into an agreement or contract with any person for the purpose or sale of equipment, material and supplies.

k) enter into an agreement with the Province, any municipality or any other corporate authority or person;

l) hire staff and set and pay their salaries.

(3) Method of Operation

In order to maintain local identity and make administration less cumbersome, districts that encompass more than one municipality are divided up into smaller administrative units

known as sub-districts.

These units are administered locally by sub-district committees which have been established as previously outlined. The committees have certain specific duties. They must:

a) Study the conservation requirements of a sub-district and make recommendation to the Board;

b) Promote and encourage the purposes of the Conservation Districts Act;

c) Act as a liaison between the councils of included municipalities and the Board;

d) Submit each year to the Board, prior to December 31st, a recommended program of works for the next ensuing year.

Once the sub-district programs have been submitted to the Board, the Board uses this advice in developing specific sub-district programs as well as administrative programs and works programs common to the entire district. The Board must then determine. how much money will be required to carry out the program and strike a budget which is within the bounds of available funding. The chief funding sources for the district are provincial grants and municipal levies. Provincial grants are disbursed according to a cost-sharing policy and the limits for municipal levies are set by the order-in-council establishing the district. The Board also accepts fits or grants from individuals, corporations, municipal councils or any other organization or agency. The board may also, subject to limitations specified in the Act, borrow money to help finance district programs.

The programs are then forwarded to the Conservation Districts Commission for review. The Commission reviews the program in terms of whether or not the proposed program as a whole or any of its elements are directed at the achievements of the objectives and purposes of the Act and proper watershed management practices.

Once the programs have passed this phase of the approval process, they are ready for implementation by the Board.

The Board may choose one or any combination of the following methods to carry out their annual works program:

a) request the department to carry out the program as agents of the Board. (This service is free to the Board);

b) carry out the program through its manager and staff;

c) hire consultants to effect all or part of the program.

III THE EIGHTH ANNUAL MEETING OF THE MANITOBA CONSERVATION DISTRICT ASSOCIATION

The Manitoba Conservation Districts Association annual meeting held in Brandon on December 6th and 7th, 1983 was attended by sixty-five participants.

This year the theme of the meeting was "People, Partners with the Environment." A total of eleven speakers addressed the assembly including the Minister of Natural Resources, the Honourable Al Mackling.

The first day's activities included, in addition to several excellent speakers, the reports from the various District Boards. At the evening banquet Walter and Judy Orr were declared winners of the Family Farm Conservation award and were presented with the Sid Ransom Trophy.

The second day began with the presentation of the Association's executive and treasurers reports followed by Mr. Mackling's address. A vote was then held on the six resolutions presented at this years meeting. Please see Appendix "A" for details. During his address Mr. Mackling indicated that in reference to resolution # 2 of the 1982 annual meeting, that it was unlikely that a system of tax credits would be instituted for people who sell lands for conservation purposes. He stated that there were other good causes that could request similar treatment and it would be difficult to draw the line if such a system were implemented in Conservation Districts. Please see Appendix "B" for further details of responses to the 1982 resolutions.

The date and place of the 1984 annual meeting was set for December 4th and 5th at the Agricultural Centre in Brandon, Manitoba. Because of the great deal of interest shown in the models and displays at the meeting, it was suggested that each district consider developing similar displays.

The meeting was adjourned after the election of Mr. Clint Whetter as the Association representative on the Conservation Districts Commission, and a final address from Fred McGinness of the Brandon Sun.

IV CONSERVATION DISTRICTS AUTHORITY

(A) Responsibilities

Formed in 1978, the Conservation Districts Authority is accountable for provincial grants of assistance to the Conservation District Boards of Manitoba. The Authority provides for the control, coordination and dispersement of all grants, financial administrative services and acts as a purchasing agent for the districts. The Authority also provides a secretary-treasurer for new conservation districts.

The Director of Engineering and Construction Branch is the manager of the Authority and secretary-treasurer is a member of the Department of Natural Resources.

In general, the functions of the Conservation Districts Authority are:

1) to ensure that the districts operate within their budgets;
2) to maintain a central bank account for the payment of district bills;
3) to procure material for district works programs;
4) to ensure district administrative expenses and equipment rental rates conform to provincial guidelines;
5) to train and assist new secretary-treasurers for district boards;
6) to assist and/or advise districts in financial and administrative matters;
7) to prepare annual financial statements of the districts and the Authority.

Other activities include:

1) determining cash flow requirements;
2) verifying, recording and paying all accounts on behalf of the districts;
3) reconciling district and Authority ledgers monthly;
4) preparing on a quarterly basis, statements to recover the district's share of the cost of district programs;
5) preparation of the annual report.

(B) 1983 Activities

In 1983 while providing normal financial and administrative support to the Conservation District Boards, the Conservation Districts Authority spent a total of $2,283,500.00 in support of District programs of which the provincial share amounted to $1,756,500.00. There were approximately 2,000 cheques issued covering over 7,000 transactions. Over one hundred purchase orders were issued to cover the purchase of $491,000.00 worth of material. Over 720 quotations were sent out in support of these purchases. Administrative expenditures by the Conservation Districts Authority in 1983 amounted to $6,103.75.

In January of 1983 in response to a request from the Turtle River Watershed Conservation District Board, Mr. W. R. Newton, Director of Engineering and Construction Branch and Manager of the Conservation Districts Authority was appointed Chairman of the Turtle River Watershed Conservation District Board. The appointment was made by the Minister in order to allow the Board to overcome certain administrative and staffing problems that the Board was experiencing at that time. To provide further assistance to the Board the Secretary-Treasurer of the Conservation

District Authority was appointed as Secretary-Treasurer of the Board. The appointments lasted until September, by which time the Board had hired a manager and secretary-treasurer and matters inspiring the interim appointments were resolved.

V REQUESTS FOR ADDITIONAL DISTRICTS

Pursuant to a 1982 request from the R. M. of Franklin, a meeting took place on January 11, 1983 with representatives of the department and council in attendance. The municipality indicated interest in forming a district based on municipal boundaries. Although no plans to proceed with a district were made at the meeting, council was advised that the department would be pleased to provide whatever assistance they could to assist council with their decision.

In January of 1983, the Branch received a letter from the R. M. of Glenwood requesting the formation of the Elgin Creek Conservation District. The Minister replied on March 4th stating that Water Resources would be developing a proposal which would go to the Commission prior to being forwarded to the included municipalities. The included municipalities were contacted prior to the proposal being prepared and they decided not to proceed with the district due to the lack of interest on the part of most of the included municipalities.

As the result of a May 1983 request from the R. M. of La Broquerie, a meeting was held in La Broquerie on June 14, 1983 to discuss the concepts and benefits of forming a district in the area. On June 24, 1983 after consideration of the matter, council requested that the department prepare a proposal for a conservation district based on municipal boundaries. The Commission reviewed the matter and a letter was sent to the R. M. of La Broquerie advising them that the Commission was recommending the formation of a district in the area based on watershed boundaries. They were also advised that Water Resources would be contacting them and other involved municipalities in the near future to set up a meeting to discuss the proposed district. As of December 31, 1983 no meetings had as yet transpired.

On August 24, 1983, representatives from the Water Resources Branch met with the R. M. of Thompson Council to discuss the possibility of setting up a conservation district in the municipality. Council had been looking for a way to set up a coordinated program in the R. M. of Thompson to deal with land and water resource problems. Although the setting up of a district in the municipality seemed feasible, council decided to leave that decision up to the next council to be elected in the fall. Previous interest had been shown in the area at a 1982 meeting attended by the R.M.s of Dufferin, Grey, Lorne, Thompson and the Town of Carman. Water

conservation and flood protection were some of the concerns discussed at that meeting.

Late in 1983, the L.G.D. of Mountain requested informational meetings to discuss the possibility to setting up a conservation district in the Swan River Valley area. The Water Resources Branch advised the L.G.D. that a meeting or a series of meetings to discuss the request would be held early in the new year with the exact dates to be determined after consultation with the municipalities in the area.

The R. M. of Tache had shown interest in 1982 in having a district formed to encompass certain lands within the R. M. of Tache. Since the idea of a larger district (Seine River Basin) was rejected, the R. M. approached the Cooks Creek Conservation District to see if an area encompassing the lower Seine River might be added to the Cooks Creek Conservation District. In June of 1983, the Cooks Creek Conservation District sent a reply to the R. M. of Tache requesting that they contact the other municipalities which would be included in the new area to see if they were interested. As of December 1983, no reply had been received from the R. M. of Tache.

VI THE CONSERVATION DISTRICTS COMMISSION

The Conservation Districts Commission provides advice and guidance to all Conservation District Boards in Manitoba. The Commission is made up of no more than seven members appointed by the Lieutenant-Governor in Council. Members include representatives from the Union of Manitoba Municipalities, the Conservation District Boards of Manitoba and Government departments having direct concern in the administration of the Act. The Conservation Districts Act lists the duties of the Commission as follows:

The Commission shall:

a) advise the Minister at his request in all matters relating to the Act and the administration and operation thereof;

b) give such advice and guidance to a Board as may be requested by the Board or as the Commission deems advisable; and

c) review in any year the scheme, operations and budget of a board and make recommendations thereon to the Minister.

For a listing of Commission members for 1983, please see Appendix "C".

THE WHITEMUD WATERSHED CONSERVATION DISTRICT

WHITEMUD WATERSHED CONSERVATION DISTRICT

I FOREWORD

Incorporated in March, 1972, the Whitemud Watershed Conservation District includes approx. 711,495 hectares extending from Carberry to Kelwood and from the Portage Diversion to Minnedosa. This area includes 15 rural municipalities and 3 towns. There are 8 sub-districts determined by the drainage basins of the major tributaries of the Whitemud River. The sub-district committees act in an advisory capacity to the Main Board with each committee chairman sitting on the Board.

Following is a summary of works carried out during 1983.

Attached as Appendix "D" is the 1983 Auditor's Report for the District.

II WORKS PROGRAM

(A) Land Drainage Program

The land drainage program was a program of drainage maintenance carried out under the supervision of the Engineering and Construction Branch on behalf of the Board.

The following is a summary of expenditures by Sub-Districts in 1983:

Sub-District #35, Willowbend Creek	$156,629
Sub-District #36, Westbourne Drain	127,092
Sub-District #37, Squirrel Creek	30,915
Sub-District #38, Pine Creek	47,747
Sub-District #39, Central Whitemud	143,206
Sub-District #40, Upper Whitemud	43,810
Sub-District #42, Big Grass Marsh	73,847
Sub-District #43, Big Grass River	133,683
TOTAL	$756,929

For further details see Appendix "E".

In addition to the many routine surveys which were carried out in conjunction with the annual works program, most sub-districts had one or more specific problem areas which were either under investigation or being dealt with in a special fashion.

Sub-District #35, Willowbend Creek

The program of removing the brush, bullrushes and weeds from the channel bottom of Rat Creek from MacDonald to the Whitemud River continued in 1983. A pilot channel with a uniform gradient was constructed to drain low areas along the channel bottom. The entire channel is then seeded to grass. This program, which is expected to take several years to complete, would significantly increase the carrying capacity of the creek and reduce the extent

of the overland flow which now occurs during flood events.

Work was continued on a long-term program to improve the level of agricultural drainage in the Perch Creek sub-watershed. The heavy soils and flat slopes found in this 47 square kilometre project area make it susceptible to significant crop damages from excess precipitation during the growing season.

Maintenance included 2 major culvert installations, 4 cleanout projects and a tidy-up from previous works.

Sub-District #36, Westbourne Drain

Work continued on the Youill project which is similar to that proposed for the Perch Creek sub-watershed in Sub-District #35. The 31 square kilometre project area is located in the northeast corner of Township 12, Range 9W.

In Township 12, Range 10W reconstruction of the Lake 24 Drain was carried on through the most difficult portion of the project.

Sub-District #37, Squirrel Creek

The Hugo Drain was completed with the system now meeting agricultural standards. Cleanouts, resloping and dyke repairs were carried out at 6 locations.

Sub-District #38, Pine Creek

An ice regulating slot was installed in the Pine Creek drop structure. Construction of a south dyke on the Gillespie Drain was continued. Eventually, the headwaters of the Fourth Base Drain will be diverted into what will be a double-dyked channel along the Gillespie. This program is intended to prevent the severe erosion damages to land south of the Gillespie Drain and to change the Fourth Base into a minor local drain which will require less maintenance than at present.

Sub-District #39, Central Whitemud

Work on the Dead Lake Drain continued. Gladstone Drain is now completed. Runway stabilization projects were implemented on escarpment drains. A shale trap was installed on the Eden Creek system and 1 major cleanout done on the Mekewin Drain.

Sub-District #40, Upper Whitemud

Work on the Upper Whitemud project almost completed. Escarpmental runway stabilization was carried out at 4 locations.

Sub-District #42, Big Grass Marsh

Construction continued on the Jordan Drain Diversion. When completed, this project is intended to contain the overflows across lands to the northeast which frequently occur from a point on the Jordan Drain some 4.8 kilometres west of Plumas. A self-regulating control structure will be installed at the point of diversion from the Jordan Drain which will divide the flow on the Jordan so that part continues down the existing channel through Plumas and along PR 265 to the Big Grass Marsh. The remainder will flow down the diversion which will be double-dyked to the marsh. Studies showed that this partial diversion of the Jordan Drain was much less expensive to build than a full scale reconstruction of the Jordan Drain would have been.

Cleanouts and resloping were carried out at 3 locations.

Sub-District #43, Big Grass River

Grass River Water Conveyance System was activated with preliminary acquisition and land clearing. Due to the pressure of servicing structures required for the transportation system, the drainage maintenance program was cancelled for 1983 and 1984.

(B) Soil Conservation Program

(1) Runway Stabilization Program

The runway stabilization program provides a method of controlling soil erosion along natural runoff channels. The sites selected for work under this program differ from gullies, which occur at random and do not constitute part of the natural drainage system. For this reason, runway stabilization projects were funded by the land drainage works program.

During 1983, the seventh year of the program, $94,083 were spent on projects throughout sub-districts #39 and #40. The costs of the program were shared between the Province and the sub-district.

(2) Grassed Waterways Program

Grassed waterways program provides reclamation and erosion control on gullies that are unmapped and are not part of the designated drainage system. Two projects were undertaken. Total cost of $1,309.00 was shared between the landowner and the Province.

For further details see Appendix "F".

(3) Forage Seed Assistance Program

Under this program forage seed was planted on lands subject to soil erosion, or on lands of marginal agricultural productivity. The cost of the program was shared between the Province and landowners. A summary of expenditures is as follows:

Total number of hectares seeded -	3,210
Costs - Province	51,000
Costs - Landowners	29,483
	$80,483

For further details see Appendix "F".

(4) Field Shelterbelt Assistance Program

A total of 93 km of shelterbelts were planted under this program in 1983. Most of the shelterbelts were planted to protect agricultural land from wind erosion. However, 7 km were also planted to provide shelter for wildlife. There were 7 km of trees that had to be replanted during 1983 because of poor survival.

Total number of kms of shelterbelts	-	93.0
Planting costs - Province (85%)	-	$20,242
Planting costs - Landowner (15%)	-	3,572
Weed control costs - Province (85%)	-	7,894
Weed control costs - Landowner (15%)	-	1,393
		$33,101

For further details see Appendix "F".

(5) Rosedale Demonstration Farm

The Board of the Whitemud Watershed Conservation District manages the Rosedale Farm which is a project to demonstrate that water and wind erosion can be controlled by a land use change to forages and trees, with cereal crops being used only during forage renovation. This approach is now being implemented by the majority of the landowners in the critical area.

Forage & Cereal Revenue -	$14,291.00
Custom Work & Miscellaneous Expenses -	8,399.83
Balance -	$ 5,891.17

For further details see Appendix "F".

(6) Demonstrations

(a) Sowing fall rye prior to harvesting on potato land - 3 landowners were involved for a total of 40.5 hectares. Satisfactory establishment was obtained for a substantial

reduction in damages from spring and fall wind erosion.

(b) Forage renovation on hay leases were not satisfactory due to droughty conditions. Total program cost - $1,291.00.

(C) Public Relations and Extension Program

Periodic press releases and advertisements were placed in local papers. Four public meetings were held to explain Board projects. Soil Stewardship Week activities included consultation and provision of suitable material in all churches. Also, all grade 7 students in the District attended a one-day seminar on local soils and their related resources. Eight landowners participated in the Conservation Farm Family Award. The provincial award was won by a Whitemud Watershed farmer from Franklin; Walter Orr and family. Six schools participated in field trips by bus which was preceded with classroom slide shows and discussion. The total cost of this program was $12,268.00.

(D) Wildlands Program

Wildlands included the ongoing planting of fruit bearing trees, shrubs and forages for wildlife and the provision of services to the Boy Scout tree planting exercise in the sand dune area. The program also included the sponsorship of wood duck nests along the Whitemud River. Forty-seven nests were built and located by Grade 7 students from Neepawa. Six projects were implemented with landowners making an overall total of 1,300 hectares dedicated to remain in their native state for the benefit of all wildlife and plants. Total program cost- $7,298.00.

(E) Administration and General Board Program

This program provides for salaries and expenses for board employees and the remuneration of board and sub-district members. Also covered are the costs associated with the operation of the Neepawa Office. Total administrative costs $72,704.00.

The Board also operates an equipment pool and an inventory yard. In support of these programs the board purchased certain small tools at a cost of $1,863.00.

THE TURTLE RIVER WATERSHED
CONSERVATION DISTRICT

TURTLE RIVER WATERSHED CONSERVATION DISTRICT

I FOREWORD

The Turtle River Watershed Conservation District lies along the northeastern slopes of Riding Mountain National Park. Established in 1975, the 281,812 hectare district includes the combined drainage areas of the Turtle and Ochre Rivers. Approximately one-quarter of the District lies within Riding Mountain National Park. The District is comprised of three sub-districts: the Upper Turtle River Watershed, Lower Turtle River Watershed and the Ochre River Watershed. Attached as Appendix "G" is the 1983 Auditor's Report.

II WORKS PROGRAM

During 1983, a major portion of the Board's budget was spent on the land drainage program. The program was administered by Engineering & Construction Branch of Department of Natural Resources on behalf of the Board.

A summary of expenditures follows:

Sub-District #44 - Upper Turtle River	106,130.50
Sub-District #45 - Lower Turtle River	357,870.89
Sub-District #46 - Ochre River	32,198.76
	$496,200.15

See Appendix "H" for more details.

(A) Surveys and Investigations

On behalf of the Board, Engineering and Construction Branch conducted several surveys and investigations throughout the District in 1983. Surveys were conducted primarily for proposed drainage maintenance and drainage construction projects.

(B) Soil Conservation

The Turtle River Watershed Conservation District completed its sixth year of the soil conservation program in 1983. Forage seed was planted on land of marginal agricultural capability and/or land susceptible to soil erosion by wind and water. There were 135 applications approved and 2,325 hectares seeded at a cost of $71,547.75.

III OTHER BOARD ACTIVITIES

(A) Administration

In May, a Manager was hired. Also, the Secretary-Treasurer was employed full time effective November.

(B) Resource Management Scheme

The District began initiation of an interim management plan in conjunction with the Department of Natural Resources. In addition, the Remote Sensing Centre began preparing a land use mapping project of the District.

THE ALONSA

CONSERVATION DISTRICT

ALONSA CONSERVATION DISTRICT

I FOREWORD

The Alonsa Conservation District is located on the western shore of Lake Manitoba and includes most of the area within the Local Government District of Alonsa. Established in 1978, the 267,555 hectare district includes the major drainage areas of Crane River, Lonely Lake, Sucker Creek and Garriock Creek as well as other smaller drainage areas. The estimated total drainage area of these four watersheds is 181,200 hectares. The district was formed primarily for agricultural land drainage improvement and land management.

During 1983, the Districts 5th full year of operation, land drainage and soil conservation programs were continued. Also, in 1983, the Alonsa Conservation District Resources Management Scheme covering all aspects of conservation within the boundaries of the Alonsa Conservation District #3 was completed and should have the approvals necessary to put it into effect early in 1984.

Attached as Appendix "I" is the 1983 Auditor's Report.

II WORK PROGRAMS

(A) Land Drainage Programs

A major portion of the Board's budget was spent on the land drainage program. The program was administered by the Engineering and Construction Branch of the Department of Natural Resources on behalf of the Board. The total cost of the program was $110,491. Major projects were the completion of the Lonely Lake project, North Leifer Drain improvements and brushing of Rockland Drain. The detailed division of cost may be seen in Appendix "J".

(B) Soil Conservation Program

Soil conservation continued for the 5th year in the 1983 program. The only soil conservation program to date remains the forage seed assistance program which is the most practical and feasible application for the district since this area has a great deal of natural land cover of bush, and low lands, and a shallow soil depth which makes cereal cropping a less attractive and oft-times ill-advised practice. Due to the terrain and geographical features, and the region's dependance on agricultural income, this aspect of soil conservation will continue to be of considerable importance.

Forage seed was planted on land of marginal agricultural capability and/or land susceptible to soil erosion by wind and water. The Province paid 85% of the budgetted program and the

farmers paid the remainder. There were over 140 applicants approved, seeding an approximate total of 2,086 hectares.

The Board continues to conduct a forage seed evaluation program each year.

THE TURTLE MOUNTAIN
CONSERVATION DISTRICT

TURTLE MOUNTAIN CONSERVATION DISTRICT

I FOREWORD

The 261,080 hectare Turtle Mountain Conservation District includes all the area within the rural municipalities of Brenda, Morton and Winchester and the incorporated towns of Boissevain, Deloraine and Waskada. Order-in-Council 668/78, which established the district on July 5, 1978, was revised by Order-in-Council 933/80 to authorize the district to undertake water control works as of September 24, 1980. The district is divided into five sub-districts: Upper Pembina River, Elgin Creek-Whitewater Lake, Medora Creek, Waskada Creek and Chain Lakes - based on natural drainage patterns.

The Auditor's Report for 1983 is included as Appendix "K".

II BOARD PROGRAMS

(A) Soils Program

Forage seed assistance has continued to be the district's most popular single program. Designed for lands subject to erosion or salinity, the program offers landowners a choice of five forage mixtures with the province paying 85 percent of the seed cost. In 1983, 84 applicants received seed for 1095 hectares.

Gully stabilization projects - the shaping and seeding to forages of gully erosion on agricultural land - were undertaken on four farms in 1983.

With the assistance of staff from the PFRA Tree Nursery, single-row green ash field shelterbelts were planted on one farm. The 3.2 kilometres planted brought the total to approximately 75 kms in the past four years. The majority of the plantings were rotovated at least once during the summer. In addition, the district employed 11 students for varying periods of time to hand weed field shelterbelts and tree plantings at Boissevain reservoir.

The district's other major soils program involves the seeding of forages on road allowances. The majority of that work is done in conjunction with municipal road construction or improvement. During 1983, 3.2 kms of cultivated, non-maintained road allowances were re-seeded to forages. That was the first time the district had been involved in that type of work.

(B) Public Education

The district's varied public education program was continued in 1983.

On-going projects included a conservation day for grade seven students, Soil Stewardship

Week promotions, the purchase of books for school and regional libraries and the publication of a new column in local weekly papers.

The conservation day program was offered twice in May; once for 60 grade seven students from Deloraine and Waskada schools and a week later for 32 grade six pupils from Melita. On each occasion, the students were split into groups for approximately one hour sessions on native plants, soils, wetland ecology and freshwater life.

To promote Soil Stewardship Week, the district again provided some 6000 pieces of material to 20 churches for special services and 7000 placemats to restaurants in the district. In addition, the district provided guest speakers at 13 church services on the two Sundays marking the event.

In a new venture, with the co-operation of MacMillan-Bloedel, the district began a Soil Stewardship Week promotion on grocery bags. A total of 56 bales (500 bags per bale) of bags were distributed through the district, with 14 of those going to two Soil Conservation Districts in North Dakota. The enthusiastic support of Neal Gelinas of MacMillan-Bloedel and Walter Bonkowski of the Deloraine Co-op made the success of the project possible.

Some $1,870 of books were purchased for donation to local school and regional libraries, bringing the total expenditure on that program to $8,870 in the past five years.

"TMCD Project" signs were erected at 12 locations to mark some of the district's major projects. That program will be continued and expanded in the future.

The district also prepared a display booth for the Boissevain Fair in June.

(C) Demonstration Projects

In co-operation with Manitoba Agriculture, the district completed construction on the pothole consolidation demonstration on the Dave Smith farm (W½ 21-4-21) in 1983. The project had been started the previous year.

With construction completed, a demonstration on small-scale irrigation of forage crops was undertaken on the Smith farm. The same equipment was also used to irrigate second-cut alfalfa out of a small natural lake on the Maurice Lesy farm (NE 34-1-23) south of Deloraine.

In the latter case, yield increases of approximately 40 percent were realized with irrigation.

(D) Wildlife Habitat Improvement Projects (WHIP) Program

The WHIP program is designed to allow the district to assist with wetland or upland habitat improvement projects. Work in 1983 was concentrated on the 14.5 hectares of land the district

had previously purchased beside Boissevain Reservoir and primarily consisted of maintenance projects on forage and tree plantings.

In addition to the board programs involved in that area, the Upper Pembina sub-district committee completed the exclusion fencing and bank stabilization works required as part of their program.

The whole area was dedicated as the Lorna Smith Nature Centre on June 12, 1983 with Honourable Al Mackling, Minister of Natural Resources presiding at the ceremony.

(E) Wildlands Program

Approximately 7 hectares on the NE 10-4-20 were declared a wildlands area in 1983. At the request of the original landowner, Mr. William Moncur of Boissevain, title to the property was transferred to the district from the Wildlife Foundation of Manitoba. In accordance with Mr. Moncur's wishes, the area was fenced to prevent vehicular traffic.

III SUB-DISTRICT PROGRAMS

The majority of the projects undertaken by the district's five sub-district committees consisted of runway stabilization on natural watercourses. The work involves the establishment of a uniform bottom gradient in the channels by repairing erosion damage and removing sediment. The channels are subsequently seeded to forages to protect them from future damage.

Details of the projects in each sub-district are outlined in the following paragraphs.

(A) Upper Pembina River

As previously mentioned, the exclusion fencing and bank stabilization work associated with the Boissevain reservoir project was completed in 1983.

There were also three runway stabilization projects done on approximately 3.2 kms of channel.

(B) Waskada Creek

Five and one-half kms of runway stabilization work were completed. The work is a continuation of a project begun in the fall of 1980. Since that time, a total of 21.5 kms of channel have been repaired.

(C) Medora Creek

Runway work was continued on the main Medora Creek channel, with 5.5 kms completed. Also first started in September of 1980, a total of 18 kms of channel have now been improved.

(D) Chain Lakes

Approximately 2.5 kms of runway stabilization work were completed, the first such work which had been done in that sub-district.

In addition, the severely eroded spillway on an existing dam was repaired to increase the water storage capacity.

The committee also began planning for a major earth-fill structure to serve water storage, runoff retention and erosion control needs in part of their area. It was their hope that construction could be completed in 1984.

(E) Elgin Creek-Whitewater Lake

Four kms of runway stabilization work were completed on three projects.

IV OTHER ACTIVITIES

Part A of PFRA's report on the study of saline seeps in the Mountainside area was received late in 1983. It considered the hydrogeology of the area. Based on that report PFRA indicated that they would investigate the merits of two potential engineering solutions - relief wells or an integrated drainage system - to intercept groundwater flows causing the salinity. A further report on that aspect of the study is expected in 1984.

PFRA also started investigations into the potential for headwater storage and irrigation in a portion of the upper Waskada Creek watershed. Survey work, air photo analysis and some soil test drilling was carried out in 1983 with a report on the project planned for 1984.

THE COOKS CREEK
CONSERVATION DISTRICT

COOKS CREEK CONSERVATION DISTRICT

I FOREWORD

The Cooks Creek Conservation District # 5 was incorporated 1 September 1979. The District lies east of the City of Winnipeg encompassing the whole of the Cooks Creek drainage area (sub-district #11) which drains into the Red River and two smaller drainage areas, namely, part of the Lower Seine drainage area (sub-district #9) and part of the "Bunn's Creek drainage area (sub-district #12) both of which drain into the Red River Floodway. The land area within the District is 95,574 hectares and involves five rural municipalities and one local government district, namely, the Rural Municipalities of Brokenhead, Springfield, Tache, Ste. Anne and St. Clements and the Local Government District of Reynolds.

Attached as Appendix "L" is the 1983 Auditor's report.

II WORKS PROGRAM

(A) Land Drainage (Formula Allocation)

The 1983 District program was generally directed towards the maintenance of Board drains and included structures. The program was administered by the Engineering and Construction Branch of the Department of Natural Resources, on behalf of the Board. The general program thurst and achievement consisted of the following; namely:

i) Earthwork involving drain cleanout and rehabilitation of 15.25 km.

ii) Vegetation control related to those operations of mowing, brush cutting and seeding 137.5 km.

iii) Structure replacement, rehabilitation and repairs of timber bridges and culverts at 13 locations.

iv) A summary of expenditures by Sub-District is as follows:

Sub-District #9 -	$ 30,438.66
Sub-District #11 -	140,685.42
Sub-District #12 -	14,904.64
TOTAL -	$186,028.72

(See Appendix "M" for cost breakdown by project or item).

Sub-District # 9

The general works program concentrated on vegetation control of 48 km of Board drains. Minor earthwork was effected in the Greater Winnipeg Water District drainage in Section 20-10-5E and in the Prairie Grove Drain at the north of Section 34-9-6E. A culvert installation was effected at the SE 24-10-4E along with miscellaneous timber bridge deck repairs at other locations.

Sub-District # 11

Due to the benefit of a dry year some 76.5 km of vegetation control was effected at various locations. Drainage construction and rehabilitation was effected for 9 km. Two major timber bridges at the N 9-12-6E and the W 17-12-6E were replaced with culverts. At nine other locations culverts and timber bridge repairs were installed and/or repaired. In addition a major program of beaver dam removal in the Cooks Creek from Section 31-11-6E northerly to Section 35-12-5E was undertaken during the winter of 1982/83, where some 18 dams were removed by hand and/or backhoe.

Sub-District # 12

During the year some 13 km of vegetation control was undertaken. Miscellaneous earthwork was undertaken at the N 14-11-4E, S 21-11-5E for an overall distance of two and one-half kms. Structure inspections provided for miscellaneous repairs to timber bridge decks and culvert cleanouts.

special Projects

The District undertook two approved special projects both of which were in Sub-District # 11. A major improvement to Cooks Creek Channel was effected at the West of Section 25-9-7E by the relocation of a crossing providing for unrestricted channel flow. At the East of Section 16-8-8E a realignment of drainage was effected to provide protection to that area east of the Village of Richer.

(B) Surveys and Investigations

Investigations, surveys and office studies were and are being carried out on a number of drainage matters.

Sub-District #9

(1) Prairie Grove Drain, capacity study.

(2) Station Road Drain, study to investigate the feasibility of runoff retention east of PTH # 12.

(3) Village of Dugald, flooding reduction drainage investigation.

(4) North Bibeau Drain, investigation to review possible need for upgrading the drainage standard.

Sub-District #11

(1) Salmon Lake (Lac La Bosse) in part of Township 8 ranges 8 and 9, being in general headwater area for the Cooks Creek drainage system. Overview investigation related to headwater storage and utilization.

(2) Drainage investigation Section 26-11-5E.

(3) Bridge replacement investigations related to:

i) Dubas Drain NE 9-12-6E and NE 32-12-6E

ii) NE 35-12-5E

iii) Donaldson Drain NE 2-11-6E

iv) Melrose Drain E 35-12-5E

v) Satans Creek E 17 and N 9-12-6E

vi) Cans Creek Drain (S.D. #9), E 25-11-4E

(4) Drainage investigation North of Sections 33, 34, 35 and 36-9-7E.

(5) Oakwood Road Drain, timber bridge farm crossing at North of NE 20-11-6E investigation and recommended replacement.

Sub-District #12

(1) Drainage investigation vicinity of Section 24-11-4E.

(2) Drainage investigation vicinity of North West Section 31-11-6E.

District Bridges

At the request of the District the Engineering and Construction Branch instituted a program of inspection of all timber bridges and hydraulic structures to provide a definitive record of structure suitability, estimated life span remaining and future program requirements for rehabilitation and/or replacement.

III OTHER BOARD ACTIVITIES

(A) The scheme, as required under the Conservation Districts Act is under study.

(B) Under the "General Development Agreement" and in particular the "Value-Added Subsidiary Agreement", a Federal/Provincial initiative program, related to the "Cooks Creek Diversion" the following progress was made.

i) The District consumated an agreement with the Province on August 25, 1982 to participate jointly with the Province until December 31, 1994 to facilitate tributary drainage programs related to the utilization of the Cooks Creek Diversion subsequent to the latter's completion and becoming operative.

ii) The District has been advised that the project engineering and proposed right-of-way requirements have been established.

iii) The District in cooperation with the Province held two public meetings at Dugald to provide project information and to provide a forum for public input to the project's aims,

objectives and concerns.

(C) The District in cooperation with the Department of Agriculture co-sponsored an "On-Farm Drainage" school held at Dugald on the 18th and 19th July 1983.

APPENDICES

APPENDIX A

1983 M.C.D.A. - RESOULTIONS

RESOULTION # 1

Foreman/Schmidt

WHEREAS the Province of Manitoba has indicated to the Boards of the Districts the various projects that are to be catagorized as maintenance or special projects with budgetary regulations or apportionments being laid down at two-thirds maintenance and one-third special projects, and

WHEREAS the Board of the Whitemud Watershed is in agreement that these guidelines appear to be a suitable (workable) arrangement only if the provincial grant funding allocation formula is applied equitably to all Districts, and

WHEREAS the Board of the District is also in agreement that lobbying for special projects or maintenance funds that are to be allocated under the provincial Conservation Districts grant is not a desirable method of dispersing these funds;

NOW THEREFORE the Board of the Whitemud Watershed requests the Province of Manitoba to apportion the grant funds according to the set formula and that lobbying for funds is restricted to the political process required in obtaining financial assistance for other than grant funds.

CARRIED

RESOLUTION # 2

WEISS/IVES

WHEREAS the existing Financial Assistance Policy does not provide adequate provisions to account for unique socio-economic and geographic characteristics of each District; and

WHEREAS the cost-sharing foumula relationg to different order drains creates considerable accounting difficulties; and

WHEREAS Conservation Districts had no input into Amendements to the Financial Assistance Policy;

THEREFORE BE IT RESOLVED that the Manitoba Conservation Districts Association request the Province of Manitoba to review and evaluate the existing formula, incorporating District input, to create a more equitable approach to funding District works projects.

(recorded vote FOR-8 AGAINST-13) DEFEATED

RESOLUTION # 3

SIGURDSON/JIM WHYTE

WHEREAS the new cost-sharing formula as applied by the Province of Manitoba has been in use for one working season, and

WHEREAS it has been closely examined by the administrative staff of the Whitemud Watershed and it has been found that excessive paper work and time required to record the 80% 20% and 70% 30% cost-sharing as applied to various maintenance works is not of benefit to the Province or the Boards;

NOW THEREFORE the Board of the Whitemud Watershed requests the Province to reexamine the present cost-sharing formula for the maintenance program as applied to the first to fourth order drainage system and arrive at a common denominator satisfactory to the Boards and the Province; and that the present cost-sharing on fifth order drains be retained as the fifth order drains are not in existance in some Conservation Districts or are not proportionately equal as to requirements for maintenance and reconstruction in Districts.

CARRIED

RESOLUTION # 4

KARDOES/LAW

1983 TRWCD PROGRAM APPROVAL BY CDC

WHEREAS the Conservation Districts Commission did not approve the Turtle River Watershed Conservation District 1983 Program until June 28, 1983; and

WHEREAS this delay created unnecessary uncertainties in completing the approved program in 1983 and eventually led to the postponement of projects; and

WHEREAS the District's geographic location and topography offers a short construction season irregardless of delay in approval; and

WHEREAS delay also affected the remaining Conservation Districts in Manitoba;

THEREFORE BE IT RESOLVED that the Manitoba Conservation Districts Association request the Province of Manitoba to ensure that District Programs are approved to provide sufficient time for effective and optimum program delivery.

CARRIED

RESOLUTION # 5

SCHMIDT/WHYTE

WHEREAS the Conservation Districts of the Province of Manitoba are in agreement that the Conservation District Act, Chapter C175 requires review and revision, and

WHEREAS the M.C.D.A. has spent considerable time and effort in reviewing Chapter C175 and is prepared to consult with and make recommendations to the Province of Manitoba in regard to revisions of the act that would enhance the aims and objectives of all Conservation Districts;

NOW THEREFORE the Board of the Whitemud Watershed Conservation District requests the M.C.D.A. to continue their review of all facets of Chapter C175 and recommend to the Province of Manitoba those revisions and proposals that are approved by the M.C.D.A.

CARRIED

RESOLUTION # 6

PARYNIUK/MANNS

WHEREAS urban populations influence government policy by being in the majority, and

WHEREAS large numbers of citizens in Manitoba continue to be unaware that our life style is diminishing our natural resources, and

WHEREAS the present generation and succeeding generations must be informed on the conservation needs of this province and the objectives of its Conservation Districts;

NOW THEREFORE the Conservation District Association requests that there be a liaison established between the Department of Natural Resources and the Department of Education to make available to the appropriate teachers, supplemental material on the management and preservation of Manitoba's natural resources.

CARRIED

APPENDIX B

MINISTER'S RESPONSES TO 1982 MCDA RESOLUTIONS

Resolution No. 1, Comments: As indicated, the Department is aware of the pothole consolidation demonstration project carried out by the Turtle Mountain Conservation District in cooperation with the Manitoba Department of Agriculture, and that action on the proposal would be deferred until the Department had an opportunity to assess the results of the project. The Department is presently preparing a report on the overall impacts on resources which would be affected by projects of this nature. Once this report has been considered, a Departmental position can be formulated.

Resolution No. 2, Comments: As the matters raised in this resolution deal with the matters relating to taxation, the resolution has been forwarded to the Department of Finance for its consideration and comments. Following the receipt of Finance's comments, further consideration can be given to the proposal. I would suggest that this matter could be considered further at your meeting in December, which I will be attending.

Resolution No. 3, Comments: The Department feels that this proposal has merits as the gradients on many of these soils are steep enough to result in erosion of open-type drains and, therefore, the use of tile drainage would enable the water table in the land to be lowered to permit cropping without the problem of erosion and silting in the area. Each of the projects would require a licence under the Water Rights Act to ensure that there will be no adverse impacts on the groundwater regime in the area.

The provision of grants for private landowners to carry out capital improvements to enhance the production from the land would be a departure from the principles of the present cost sharing formula. It is suggested, therefore, that the Association consider a loan arrangement having a special interest rate structure, and then approach the Department of Agriculture to determine if assistance is available through that Department.

Resolution No. 4, Comments: The resolution implies that the lands within the Park and the management of those lands by the National Parks have had a negative impact on the drainage systems lying below the Park. In the majority of the watersheds this is not the case as the problems relate to the drainage activities over the years by the municipalities in extending drainage works into the alluvial fans around the base of the escarpment. This is not related to activities in the Park.

In respect to the proposal for headwater retention dams, there may be some locations which would be economically viable, but due to the small area of the watershed in the Park, it is not anticipated that there would be a large number of these sites which could have a beneficial effect on the runoff outside the Park.

At the present time, the Riding Mountain Regional liaison Committee, composed of representatives from the municipalities lying around the Riding Mountain National Park, has initiated a project to work towards the development of a water management program for the 23 streams flowing out of Riding Mountain National Park. It is suggested that the Conservation Districts Association work closely with this Committee in developing such a plan, which then could be considered by the federal and provincial governments. The Department would be prepared to provide technical assistance on request to assist the group with the preparation of the plan.

Resolution No. 5, Comments: The Department is prepared to liaise with the Conservation Districts and the other Departments of the government through the coordinators to develop joint programs with other Departments.

The Whitemud Watershed Conservation
District, No. One

AUDITORS' REPORT

We have examined the balance sheet of The Whitemud Watershed Conservation District, No. One as at 31st December 1983 and the statements of revenue and expenditures for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as we considered necessary in the circumstances.

In our opinion, these financial statements present fairly the financial position of the District as at 31st December 1983 and the results of its operations for the year then ended in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

THE WHITEMUD WATERSHED CONSERVATION DISTRICT, NO. ONE

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31ST DECEMBER 1983

NOTE 1 - ACCOUNTING POLICIES

ENTITY DEFINITION

The Whitemud Watershed Conservation District, No. One was established by an Order-in-Council of the Province of Manitoba on the 22nd March 1972. The district receives funding from the Province of Manitoba and certain municipalities and is governed by a board of directors from the various municipalities involved in the conservation district.

INVENTORY

Inventory is valued at cost and determined on a first in first out basis.

FIXED ASSETS

Fixed assets are recorded at cost.

DEPRECIATION

Depreciation is recorded on the straight line method at the following rates:

Building	5%
Fence	5%
Equipment	15%
Pump equipment	50%

THE WHITEMUD WATERSHED CONSERVATION DISTRICT, NO. ONE

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31ST DECEMBER 1983

NOTE 2 - FIXED ASSETS

The following is a summary of the fixed asset and accumulated depreciation accounts:

	Balance Beginning Of Year	Additions	Disposals	Balance End Of Year
Fixed Assets				
Land	1,835			1,835
Building	14,783			14,783
Fence	5,339			5,339
Equipment	70,843	24,909	10,242	85,510
Pump equipment	261			261
	93,061	24,909	10,242	107,728
Accumulated Depreciation				
Building	3,696	739		4,435
Fence	1,735	267		2,002
Equipment	38,742	9,774	6,133	42,383
Pump equipment	261			261
	44,434	10,780	6,133	49,081
Net Book Value	48,627			58,647

NOTE 3 - SICK LEAVE RESERVE

The reserve has been established to recognize the accrual of sick leave of the employees. The employees accrue sick leave at the rate of one and a quarter days per month employed. At 31st December 1983, the aggregate amount of possible claims was $61,000.

NOTE 4 - CONSERVATION DISTRICT AUTHORITY OF MANITOBA

These costs represent an allocation of certain administration expenses of the Conservation District Authority of Manitoba and are fully funded by the Province of Manitoba.

AUDITOR'S REPORT

We have examined the Balance Sheet of the Turtle River Watershed Conservation District as at December 31st, 1983, and other statements, being Exhibits "B" to "F", inclusive. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion, these Financial Statements present fairly the financial position of the Organization as at December 31st, 1983 and the results of its operation for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

APPENDIX I

THE ALONSA CONSERVATION DISTRICT NO. 3

FINANCIAL STATEMENTS

31 DECEMBER 1983

B. K. PELL
CHARTERED ACCOUNTANT
WINNIPEG. CANADA

The Board
The Alonsa Conservation District No. 3
Alonsa, Manitoba

I have examined the balance sheet of The Alonsa Conservation District No. 3 as at 31 December 1983 and the statement of revenue and expenditure for the year then ended. My examination was made in accordance with generally accepted auditing standards, and accordingly included such tests and other procedures as I considered necessary in the circumstances.

In my opinion, these financial statements present fairly the financial position of the District as at 31 December 1983 and the results of its operations for the year then ended in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 1983

1) Except for payroll and incidental expenses, the expenses of the District are paid from a bank of the Conservation District Authority, a Provincial Agency which pays accounts for five districts in all.

2) Until March 1980, when the District hired its own secretary-treasurer and occupied a rent free office on the premises of the L.G.D. of Alonsa, the Government of the Province of Manitoba provided without charge all the District's administrative and technical staff requirements, office equipment and head office space. Subsequently the Government provides only the engineering and technical staff requirements without charge.

APPENDIX J

ALONSA WATERSHED CONSERVATION DISTRICT NO. 3

SUMMARY OF THE LAND DRAINAGE PROGRAM 1983

W.O. 110-1-83

Miscellaneous bridge and culvert repairs at the following locations:

N 29-20-11W	In 35-22-12W	
N 27-20-12W	E 14-21-12W	
N 16-21-11W	In 18-20-10W	
NE 15-20-10W		$5,792.04

W.O. 110-3-83

Drain bottom clean out on approximately 1 km on the Rockland Drain in Section 33-20-11W $6,458.93

W.O. 110-4-83

Levelled dump on approximately 1.5 km of drain on the Ryzner Drain North of Section 29-20- 11W

Completed the excavation on approximately 3.2 km of drain improvement on the North Leifer Drain North of Section 25-26-77-20-10W $28,208.64

W.O. 110-6-83

Completed 1 rock ford crossing on the Lonely Lake Drain N 35-24-12W $ 255.74

W.O. 110-5E-83

Completed the 1982 reconstruction of approximately 4 km of drain on the Lonely Lake Drain. Contract # 88.

Maintenance of the Lonely Lake outlet structure. $69,775.64

TOTAL LAND DRAINAGE PROGRAM - $110,490.99

P. Skoropata	Langruth	# 43	Big Grass River
Dr. K. I. Johnson	Gladstone	Government Appointee	

Sub-District Committee Members, 1983

Chairman listed first -

Sub-District # 35 - Willowbend Creek

James Knight, Macdonald — H. Schroeder, Rossendale

John Ostopowich, Rossendale — Allan McCartney, Macdonald

Sub-District # 36 - Westbourne Drain

Ed Penner, MacGregor — Charles Lambert, Westbourne

Art Scora, MacGregor — James MacDonald, MacGregor

Grant Fotheringham, MacGregor

Sub-District # 37 - Squirrel Creek

Mrs. M. Paryniuk, MacGregor — William Morris, MacGregor

Dennis Beaudin, Westbourne — R. E. Corrigal, MacGregor

Cliff Jarvis, Carberry

Sub-District # 38 - Pine Creek & Dead Lake

Harold Manns, Carberry
Glen Hughson, Austin
Roy McConnell, Gradstone
Darryl Mauthe, Gladstone
Barry Hood, Carberry
Bruce Hood, Carberry

Sub-District # 39 - Central Whitemud

A.C. McDiarmid, Gladstone
Fred Charles, Minnedosa
G. Gordon, Neepawa
Henry Kolesar, Neepawa
Les Synchyshyn, Erickson
Harold Fetterly, Neepawa
G. Montgomery, Neepawa
E.A. Poersch, Gladstone
Ron Roe, Neepawa
Robert Durston, Neepawa
Chris Sulz, Arden
Ross Bray, Neepawa
B.G. Burton, Minnedosa
Mrs. Pat Henry, Gladstone
W.B. MacDonald, Minnedosa
S.C. Carter, Bethany
Cecil Ferguson, Gladstone

Sub-District # 40 - Upper Whitemud

Robert Drysdale, Manitoba
Dennis Beaumont, Neepawa
Dave Grobb, Justice
Don Fraser, Brookdale
Harold Cleavor, Justice
Dean Gwyer, Minnedosa
Elviss Sumner, Neepawa
Gordon Ellis, Minnedosa

Sub-District # 42 - Big Grass Marsh

Einar Sigurdson, Lakeland
O.S. Eirikson, Lakeland
Lawrence Bateman, Arden
Charles Blair, Woodside
R.E. Clark, Plumas
Lionel Windus, Arden

Sub-District # 43 - Big Grass River

Kurt Schmidt, Waldersee
Garry Oswald, Glenella
P. Skoropata, Langruth
James Whyte, McCreary
John Batyski, Glenella
Douglas Leepart, McCreary
Mrs. Henriette Kleemola, Langruth
Wm. McConnell, Birnie
Gordon Smith, Waldersee
Gilbert Allen, Riding Mountain
Walter Pischke, Amaranth
Stan C. Rainkie, Plumas
D. George Walker, Birnie
Edward C. Walker, Plumas

APPENDIX O

TURTLE RIVER WATERSHED CONSTRUCTION DISTRICT

Board Members 1983

Ben Kardoes	Makinak	Chairman
Mervin Law	McCreary	Sub-District # 44
Roy Flower	Ste. Rose	Sub-District # 45
Barry Durston	Dauphin	Sub-District # 46
Herbert Schapf	Ochre River	Government Appointee

Sub-District Committee Members

Chairman *

Sub-District # 44 - Upper Turtle River

William Floyd, McCreary	* Mervin Law, McCreary
Rene Saquet, Laurier	Norman Shineton, McCreary
Geoff Burton, Kelwood	Kenneth Armstrong, McCreary

Sub-District # 45 - Lower Turtle River

Ben Kardoes, Makinak	* Roy Flower, Ste. Rose
Herman Schroeder, Ochre River	Victor Stinson, Ste. Rose
Brian Monkman, Ebb and Flow	Donald Luke, Ste. Rose
Iven Ives, Ste. Rose	Orval Hudson, Ste. Rose

Sub-District # 46 - Ochre River

Tom Smart, Ochre River	George Geisel Jr., Ochre River
* Barry Durston, Dauphin	Allan Armstrong, Dauphin

APPENDIX P

ALONSA CONSERVATION DISTRICT

Board Members, 1983

Bill Napier	Amaranth	Chairman
Alec Hrymack	Alonsa	Board Member
Russell Chrustie	Alonsa	Board Member
Barney Brandson	Ste. Rose du Lac	Board Member
Ed Zdan	Alonsa	Provincial Appointee

STANDING COMMITTEES

Agriculture and Land Use

Bill Napier	Amaranth (Chairman)
Walter Richards	Eddystone
